

ImmunoStrip® for Rhizoctonia solani (Rhiz)

Rhizoctonia solani is a ubiquitous, soilborne fungal pathogen and an important limiting factor to global food production. This aggressive necrotroph exists as a species complex and causes serious disease on a diverse range of hosts, including row crops, ornamentals, vegetables, turfgrass and several species of woody plants. Agdia's ImmunoStrip® for the detection of *Rhizoctonia solani* is an excellent screening tool for educators, growers and diagnosticians, for use in the field, greenhouse and lab.
