

Botanical Extract Library

Botanical Extract Library

ChromaDex is the leading provider of botanical reference materials, and research grade materials for the natural products industry since 1999. Our supply chain network is global and can provide botanicals that would be otherwise difficult to obtain. Our botanical extract libraries are one of a kind in terms of uniqueness and variety. Many botanicals have not been fully characterized for their biological activities and even less is known how the synergistic effects of the phytochemicals in botanicals can affect these activities. This allows for a unique screening of activity through compounds that are soluble in solvents/polarities throughout our botanical libraries.

Many traditional medicines have been used in the Americas for thousands of years. ChromaDex has put together botanicals of interest that have had some influence in indigenous cultures. These are collected from a vast array of botanicals that are available to us here in the western hemisphere. Many have not been as studied as the traditional medicines in China or India, but they still have a diverse phytochemical profile that allows for many bioactivities to present themselves. If you are in drug discovery or a similar field, please look in our extensive botanical reference library for the compounds/activities that might interest you. If you still can't find what you are looking for, give us a call so that we can source the authentic material of your choice for you.

Part Number	Botanical Name	Latin Name	Solvents	Plant Part	Family
00061812	Acai Palm	Euterpe oleracea	Hex:EtOAC (1:1)*	Fruit	Arecaceae
00061813	Acai Palm	Euterpe oleracea	Ethyl Acetate	Fruit	Arecaceae
