

Indian Botanical Extract Libraries

Indian Botanical Extract Libraries

ChromaDex is the leading provider of botanical reference materials, and research grade materials for the natural products industry since 1999. Our supply chain network is global and can provide botanicals that would be otherwise difficult to obtain. Our botanical extract libraries are one of a kind in terms of uniqueness and variety. Many botanicals have not been fully characterized for their biological activities and even less is known how the synergistic effects of the phytochemicals in botanicals can affect these activities. This allows for a unique screening of activity through compounds that are soluble in solvents/polarities throughout our botanical libraries.

In Indian culture ayurveda is a very important field of traditional medicines. It has shown over thousands of years to help prevent sickness, lessen the effects of sickness, and “balance harmony between your, body, mind, and environment. Because of the beneficial effects that most of these botanicals have had on people we know that there are many active compounds within these botanicals. Not only in immunity but they have been shown to have many other activities associated with them. ChromaDex offers some Aryurvedic botanicals in this Indian library as well as some “off the beaten path” botanicals from the country of India and surrounding areas. If traditional medicines research is interesting to you in drug discovery the Indian BXL library may be of interest.

Part Number	Botanical Name	Latin Name	Solvents	Plant Part	Family
00065922	4'O clock plant, Andhi mandarai, Gulabash	Mirabilis jalapa	Methanol	Leaf	Nyctaginaceae
